Thank you for your interest in a memorial donation to the City of Golden. Traditional memorials have been in the form of trees or park benches. The following is a description of the donation process.

## **Tree Memorials:**

After initial contact, Forestry staff members will make arrangements on site at the approximate memorial tree location. Tree species selection will be determined. Trees must be at least 2" caliper at the trunk if a hardwood species or 6 foot in height if a coniferous species is selected. Staff will provide an approximate cost. After location and tree type has been determined, Forestry staff will purchase a tree from a local nursery and provide a copy of the invoice if necessary. City staff will plant the tree at the agreed location and time and receive payment. Staff will also place a memorial tag on the permanent tree donation plaque located at the Golden Community Center. Typical cost for such trees is \$300.

## Memorial Benches

The City is pleased to offer recycled benches for those looking to donate a bench or table. Recycled benches are low maintenance and suitable for most locations. After initial contact, Parks staff will meet with the donating party at the approximate site of the bench location. Please be aware, there is no availability for benches along Clear Creek Trail at this time.
